Dear Parents and Grandparents:

Have you ever seen a square bubble? It's an amazing sight to behold. But more than that, it's a great way for your kids to instantly grasp fundamental concepts found in math, science, art, music, and more.

Award-winning Zome® is the only toy in the world based on the actual building blocks of nature, which means it fosters hands-on intuitive learning. Plus, Zome is designed for open-ended play so kids can master it all by themselves—at their own pace and at their own developmental level!

No wonder you'll find Zome in over 4,000 schools nationwide! Best of all, Zome offers hours of fun. Simply build a Zome shape, dip it into the exclusive bubble solution, and use the Zome straw to stretch, bounce, and expand the wildest bubble shapes you've ever seen.

Create 3-D triangles, squares, pentagons, and of course, round bubbles, too. Plus, the expandable Zome System lets you add more pieces as your child's imagination and brain power soar. (It's one toy you never outgrow!)

Order the **Zome Special Bubble Edition Adventurer Kit** now for only \$39.95 and get a jumbo bottle of our exclusive bubble solution FREE for hours of bubble-making fun!

Give your child or grandchild the gift that will last a lifetime. Call Toll Free 1-888-408-9177 today.

Sincerely,

Paul Hildebrandt

Paul Hildebrandt,
Co-Inventor, Zome System

P.S. Zome is backed by an Iron-clad 100% risk free guarantee. But hurry, quantities of the Special Bubble Edition are limited. Call now to take advantage of this holiday offer.

NASA Scientist

Introducing the Zome® Special Bubble Edition Adventurer Kit...

If You Can **Dream** It You Can **Build** It!

Discover

Zome is the only toy in the world based on the building blocks of nature. Unlike computer games and artificial building toys, award-winning Zome encompasses a universal language of shapes and spatial relationships your child can intuitively grasp and grow with.

Excel

Zome makes learning second nature! Your kids may not know they're learning, but chances are, you'll see it in their grades and in their newfound understanding of the natural world around them. If you want your kids to excel in school, give them the tools they need to understand the universe.

Build

Zome builds better bubbles and better brains. Just as muscles need physical exercise, brains need mental exercise to grow strong. And leading brain researchers have proven that your child uses mental challenges, like Zome, to develop new connections within the brain. These critical pathways are absolutely essential for learning and thinking. Getting smart has never been this much fun!

Everyone Is Raving about Zome. And They're Handing Out Awards!

Zome continues to win prestigious awards and high praise from the national media, including:

- The Oppenheim Toy Portfolio Gold Seal Award •
- Parent's Choice Gold Award • Parenting Magazine
- Amazing Toy Award • Dr. Toy • The National Parenting Center • Parent Council Ltd. • Family Life Magazine •
- Child Magazine • NCTM Teaching Children Mathematics
- Wired Magazine • Cable Vision Math Monday •
- Parent's Guide to Children's Media • Westword's
- "Best of" Issue • Compressed Air • Museum
- Store Association Magazine • and Parent's Choice Approval Award

Have Fun

Zome provides hours of hands-on fun as your kids create the most amazing bubbles and shapes on earth. Build animals, flowers, rocket ships, airplanes, bridges—anything you can imagine. Hang them like mobiles. Use them in school projects. Create awesome bubbles within circles, squares, and triangular shapes!

Create

Whether you're six or sixty, Zome fosters creativity! In fact, Zome is used by internationally-renowned scientists, artists, mathematicians, NASA engineers, and Nobel prize winners to create everything from architectural models to spaceship prototypes. But you don't have to be a rocket scientist to love Zome. Thousands of fun-loving kids all over the world use Zome to create really cool bubbles.

Connect

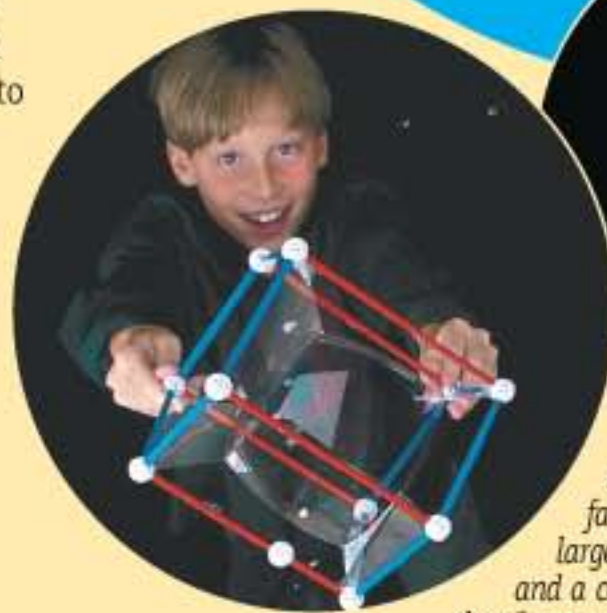

Wherever you find Zome, you'll find kids exploring, creating, and connecting with amazing ideas... and with each other. But you'll notice something else, too. Girls and boys are equally spellbound by its limitless creative possibilities. Yes! Zome ignites a lifelong passion for science, math, nature, and art in everyone!

"I was very excited when I got Zome for Christmas. My two favorite things to build are a very large spaceship that I can go inside and a collection of connected models that I pretend is a quantum computer."

Kiel, Age 7
